

# English's wine list

## Winter 2018

So Winter is here and so is another small wine list revision – mostly vintages. Alas with the value of Sterling continuing to be “challenging” there have been a few price increases but not too many with most of our suppliers being sensible. Following our major wine list revamp last year there are not so many changes but we are always on the lookout for new and interesting wines and we are sure to add a few as the months roll on.

Laurent-Perrier has released their first “new” wine since the early 1980’s! La Cuvée replaces their Brut NV and is not merely a rebranding as the amount of Chardonnay has increased and it spends an extra year on the lees as well as other changes. La Cuvée has now replaced the Brut NV as our house Champagne.

Speaking of sparkling wine, making a welcome return by the glass and offering great value for money is Sensum Laxas – the unusual but very tasty sparkling Albariño brought over from Galicia in Spain by our good friend Xaime Quiroga. Other newcomers include Mas des Dames Blanc from Languedoc-Roussillon, France and something a bit special from the Jura – Philippe Bonard’s Chardonnay Gaudrettes. On the red side there are some “Second” wines from well-known Bordeaux Châteaux and a beautiful Barolo and a Barbera from the respected Cascina Dardi.

We hope you enjoy your visit to English’s and of course the wines – SLJ January 2018

## Champagne

### Laurent-Perrier

Founded in 1812 Laurent-Perrier is still family owned and produces a comparative small amount of Champagne compared to some of the other Grande Marques. As recently as the late 1940's they produced as few as 80,000 bottles a year but nowadays annual production is nearer 100 times that figure - but that's still a fraction of the likes of Moët who make around 30 million bottles per year! Laurent-Perrier are based in Tours-sur-Marne, ideally situated at the crossroads of the three main wine growing areas of the Marne département: the Montagne de Reims, the Vallée de la Marne and the Côte des Blancs. It is also one of the 17 Champagne villages ranked in the prestigious Grand Cru area.

Issue comes from 3 vineyard plots in Remoño, Arnoia, Ourense which total just over 2 hectares of clay, sand and granite soils. Issue is made from three almost forgotten grape varieties: Lado, Silveriña and Verdello. The plots go beyond normal organics and in addition to no chemical use at all, Bernardo Estévez follows the natural agricultural principles founded by Masanobu Fukuoka in Japan – completely natural, ‘hands off’ farming in order to impart the most natural re-creation of the soils in to his wines. The wine remains in oak for 10 months before being transferred to bottle for a minimum of 12 months. “Green notes such as fennel, juniper and tips of ripe white fruit on the nose. The palate is a cluster of sensations that are distributed in a balanced way across the palate, where especially the creaminess, flavour and acidity are the protagonists”.

## Dessert wines

### France

#### Château Yquem 1998/9, Sauternes, Bordeaux (13.5% abv)

Possibly the most famous dessert wine? The vineyard (of 80% Sémillon and 20% Sauvignon Blanc) is situated between the villages of Sauternes and Fargues, and is about 113 hectares in size, although only around 100 hectares are in production at any one time. The site is particularly susceptible to Botrytis, “Noble Rot”\*, which makes Bordeaux’s famous sweet wines what they are. The 1998 vintage is described as ‘Pale yellow. Nose was very elegant with well-shaped noble rot, and had a lot of sweetness on the palate with mango, apricot and acacia honey. This was a wine with pure style, much finesse and long aftertaste, but at same time also “light-footed”’.

Half Bottle (37.5 cl)                      £120.00

\*Noble rot is the kinder form of the fungus, Botrytis cinerea, which affects wine grapes. It requires moist conditions and if the weather remains damp then the bad form, known as "grey rot," can destroy whole crops of grapes. Infected when they are ripe, if drier conditions then prevail they become slightly raisined and if picked at the prime time can produce elegant wines such as Yquem.

Some almond notes enrich the aroma due to the ageing in wood. The balance between the sugar and the acidity is excellent, leading us to fresh and citric sensations on one side and the complexity of wines that have aged in barrel on the other.
